## CUBE MP Series CenturyLink Ordering Guide

CUBE MP Series enclosures are designed to serve as all-purpose remote Ethernet terminals that can house a variety of equipment in a compact, environmentally protected cabinet. Units feature 14 gauge steel construction with powder-coated paint, continuous hinge doors, weather-tight seals, knockouts, and three-point door latch with padlockable handle to ensure equipment mounted inside is protected from the elements and unauthorized entrance. These cabinets come equipped with wooden equipment mounting backboards for vertically mounted RAD Ethernet equipment, fuse panels, fiber drops and many other types of low power telecommunication equipment. CUBE MP Series cabinets are designed to meet with NEMA 4 requirements.
